

# CONTROL AND AUTOMATION

- ◆ Design and supply of Control and Automation solutions
- ◆ Upgrades and retrofits of existing process and manufacturing lines
- ◆ Process monitoring and production control enhancements
- ◆ Integration of manufacturing areas
- ◆ Bridging the gap between the plant floor and the plant MIS
- ◆ Application of latest technologies in instrumentation, PLC's, HMI's and communication networks to achieve cost effective and user friendly solutions
- ◆ Quad Automation is a product independent company. We choose the best technologies for the application
